

Dear companion animal owner !

We let you know that at the Small Animal Clinic of the Faculty of Veterinary Science, the basic fee for the night duty service yields a minimum of 30,000 HUF which includes the fees of the basic clinical examination, overhead costs, as well as the costs of the working power. Any other costs (like those for medicines, laboratory examinations, operation costs etc.) are charged in addition to this fee, depending on the actual needs of the given patient. The basic clinical care will be provided by a veterinarian specialized in internal medicine, surgery or obstetrics. Should it be necessary and supposed that you cover the further costs, a veterinarian of the other specialty can be called in. This will initiate a further charge of 10,000 HUF.

We kindly provide the emergency medical care of your dog or cat, if you cover the above mentioned costs . Large animals are seen in our Large Animal Clinic at Üllő, “Dóra Major”, tel.: 06-29-521-300.
